

### **Remarks/Arguments**

Claims 2-13 and 15-16 are pending in the application. By this amendment, claim 15 has been amended and claim 16 has been canceled.

Applicants' Representatives thank the Examiner for the courtesy of an interview on January 5, 2010, where proposed claims were discussed with the Examiner in view of the cited prior art. Specifically, proposed amendments, which are now present in independent claim 15, were presented and discussed relative to the prior art. It was agreed by the Examiner that if these amendments were made, the claims would overcome the rejections in the current Office Action.

Applicants believe the amendments made herein add no new matter. Any amendments to the claims which have been made in this amendment, and which have not been specifically noted to overcome a rejection based on prior art, should be considered to have been made for a purpose unrelated to patentability, and no estoppel should be deemed to be attached thereto.

Reconsideration and reexamination of the application is respectfully requested in view of the amendments and the following remarks.

#### **Rejection Under 35 U.S.C. §102(B)**

Claims 2-6 and 15-16 stand rejected under 35 U.S.C. §102(b) as allegedly anticipated by European Patent Application No. 1096051 (EP '051). The rejection is traversed.

Claim 16 has been canceled; therefore, the rejection with respect to this claim is moot.

Based on the interview, it is believed that amended claim 15 defines over the prior art of record. Therefore, it is believed that no further argument is warranted. Applicants request withdrawal of the rejection, and the allowance of claim 15.

Claims 2-6 depend from independent claim 15. In light of the allowability of independent claim 15, the rejection of claims 2-6 is moot in light of their dependency on an allowable base claim. Applicants request withdrawal of the rejection, and the allowance of claims 2-6.

#### **Rejection Under 35 U.S.C. §103(a)**

Claim 8 stands rejected under 35 U.S.C. §103(a) as allegedly unpatentable over '051 in view of EP1156318. The rejection is traversed.
